EDUCATION

Open University Malaysia Bachelor of Information Technology with Hons	Selangor, Jan 2026 – Present
Kolej Vokasional Kuala Krai Diploma in Information Technology	Kelantan, August 2023 – August 2025

EXPERIENCE

EUC Engineer Petaling Jaya, Selangor Mesiniaga Berhad - Resolved 60%+ of common endpoint and workplace technology incidents on first contact, improving user satisfaction and reducing repeat escalations across daily operations. - Collaborated with networking and infrastructure teams to investigate major incidents for UEM Sunrise, restoring service faster and minimizing downtime for business-critical users. - Reduced average ticket resolution time by 20% through structured troubleshooting. - Created technical documentation and troubleshooting guides that cut recurring tickets by 15% and strengthened onboarding and training for support workflows.	September 2025 – Present
IT Support Intern Petaling Jaya, Selangor Mesiniaga Berhad - Supported 100+ end users across multiple departments, resolving endpoint, Microsoft 365, and network issues. - Assisted in the deployment and configuration of 50+ laptops and desktops. - Built foundational experience in endpoint management, IT operations, and infrastructure support, with exposure to cloud-adjacent platform services and incident management. - Transitioned into EUC Engineer based on performance, technical capability, and consistent contribution to daily operations and customer needs.	April 2025 – August 2025

PROJECT

Serverless AI-Powered Cloud Facts on AWS <i>API Gateway, Lambda(Python), DynamoDB, IAM, Bedrock(Nova Lite), Amplify</i> - Built a serverless web application that delivers AI-enhanced cloud facts. - Developed a Python AWS Lambda function to retrieve facts from DynamoDB, strengthening data platform integration and backend automation. - Configured Amazon API Gateway with CORS to integrate securely with Amazon Amplify, improving application reliability and deployment readiness. - Designed a scalable, fully managed architecture using AWS serverless services.	
Automated Resume Deployment on AWS EC2 <i>EC2, Ubuntu, Apache2, Github Actions, Continuous Deployment(CD), SSH</i> - Built and deployed a responsive resume website on an Ubuntu EC2 instance using Apache. - Automated website deployments from GitHub to EC2 through GitHub Actions and SSH. - Configured SSH authentication, GitHub Secrets, Security Groups, and web-server access. - Diagnosed and resolved deployment, HTTP, CSS, and EC2 networking issues.
